

# Environmental and Energy Resources Working Group

*Have you encountered an instance where information relevant to an adaptation project you were involved with was held by one state agency and not available to another state agency?*

*Do you have examples of planned climate adaptation activities or suggestions on methods and means to simplify/streamline interagency review?*

*Has a project you have been involved with encountered conflicting guidance or rules from state and federal agencies for the same climate adaptation activity, such as restoring damaged infrastructure?*
