

# CUTTING ENERGY WASTE SAVES MONEY AND HELPS OUR ENVIRONMENT.

Addressing climate pollution starts with reducing wasted energy. Rapport's software tracks water and electricity use and carbon emissions, helping companies cut waste, save money, and reduce their impact on the environment.

“I could run my business from anywhere in the world; I choose Maine because it's a wonderful place to live. I support the Clean Power Plan because it helps Maine retain its character and renowned natural resources.”

*John Rooks, CEO,  
RAPPORT, Portland*

## Tackling climate change, saving Maine jobs

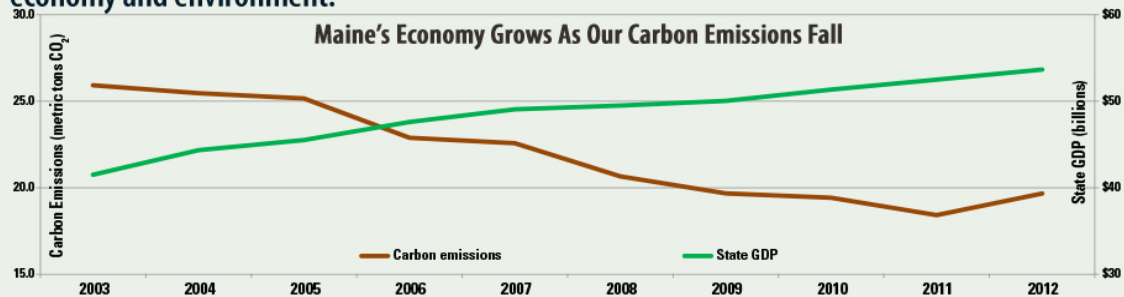

## DID YOU KNOW?

Because Maine is part of the Regional Greenhouse Gas Initiative (RGGI), we are poised to easily meet the requirements of the Clean Power Plan. RGGI increased Maine's Gross State Product by \$214 million and created several hundred jobs across the state as well, according to an independent analysis.

Tackling climate change through RGGI has opened up opportunities, saved Mainers money, boosted our economy, and improved jobs markets. The Clean Power Plan is good for Maine's economy and environment!

## Maine's Climate Leadership is Growing Our Economy and Making Us Ready for the Clean Power Plan
